## ABOUT ME

Results-Driven Developer | Committed to building high-performance applications, streamlining processes, and solving complex challenges while continuously learning and making an impact in a dynamic organization.

## EXPERIENCE

### Cholamandalam Investment and Finance Company Ltd.

Software Developer

Jan 2024 - Current

- Worked on LEAP, a Sales Vehicle Finance application, focusing on backend development, API design, and database optimization. Automated loan processing via Node.js batch jobs for improved operational accuracy.
- Developed and scaled OEM Insights, a full-stack analytics dashboard for OEM partners to track leads, disbursed amounts, and business KPIs. Designed NestJS APIs processing 80K+ records to deliver real-time insights via a dynamic frontend with interactive charts and filters.
- Developed centralized performance dashboards using Grafana and ClickHouse to monitor API health, system usage, and database performance.
- Implemented SSO in LEAP with token-based auth, coordinating with backend validation via enterprise IDPs. Ensured secure token storage and cross-window communication

### Mahatma Gandhi University

Associate Developer - Trainee

Dec 2022 - Sep 2023

- Engineered a scalable education portal to streamline key processes for research students, including PhD entrance exams, fellowships, and coursework, enhancing accessibility and efficiency.
- Collaborated with a dynamic team to deliver an intuitive and high-performance solution, elevating the educational experience while honing expertise in software development and project management at MGU.
